

DESCRIPTION

Envistone Architectural Masonry emulates the aesthetic appearance of natural stone, yet is cost effective, readily available and offers tremendous flexibility. Its broad range of sizes provides the capacity to create prestigious, traditional-style buildings easily and offers a pallet of colors varied enough to complement the dominant regional features. **Envistone** can be used on its own to create buildings of subtle character or combined with other envicrete masonry products in feature panels or bands to create strikingly unique buildings.

Product	Sizes (mm)	Quantity Per Pallet
Envistone	390mm(l) x 190mm(h) x 90mm(t) (Tolerance±2mm)	120 PCS
