

EnviClad interlocking wall and ceiling liner panels feature a multiwall structure that results in a high level of rigidity and strength, and allows for rapid installation. Interlocking tongue & groove edges allow fasteners to be completely hidden, resulting in a clean, smooth finish.

Use it for interior cladding for all types of structures.

## Utility and versatility never looked so good.

Duraclad PVC Interlocking Liner Panels are smooth and hygienic, and are easy to clean and maintain. And they can handle abuse in tough environments. Designed for a variety of ceiling and wall applications, you can't find a more handsome solution.
